

TT-TABLE-T5 Series

The multi touch table for meeting room.

Description

The T5 multi touch table is the most innovative solution for meeting and huddle rooms.

It's designed so that people sitting around the table can comfortably reach the central touch area from any position.

In a sleek metal design the table structure is ergonomic (from 6 up to 10 people) it can include an high performance controller based on the latest Intel CPU. A professional, high brightness 65" LCD, with a pin-sharp resolution of 3840x2160 pixels and extended viewing angles, delivers perfectly smooth and vivid images, with high-quality content, even at the extreme angles for the people seated around the table. In addition, it comes with four side connection bays equipped with power supply, video signal and data connections.

The table surface is a clear transparent multi touch glass with 40 simultaneous touch, pressure and palm recognition. All around the edge of the glass is a 20 cm surface in acrylic nanotech resin, that is anti-fingerprint, anti-scratch, antibacterial; with a soft feeling matt finish. As an option it's possible to equip the T5 with a wireless charger for mobile phones and smart devices (like wireless BYOD) that are hidden below the surface that can be customized with many type of woods.

The T5 multi touch table can be joined with a squared extension to build a longer table. The base table and the extension can be joined with additional modules to compose different table layouts including L and U shapes.
